

PRIMARY DISTRIBUTION
1,000 to 5,000 doses

HOSPITAL SYSTEMS,
PHARMACY DEPOTS, & STATES

SECONDARY DISTRIBUTION
500 to 1,000 doses

HOSPITALS, PHARMACIES,
& DOCTOR'S OFFICES

LAST MILE

5 to 500 doses

SMALL AND MEDIUM SIZE
VACCINATION SITES,
LONG-TERM CARE FACILITIES

YOUR SIMPLE AND RELIABLE SOLUTION FOR THE DISTRIBUTION OF COVID-19 VACCINES

From manufacturer to distribution hub to point of use (POU)

THE FIRST COVID-19 VACCINES ARE READY. HOW WILL THEY REACH PATIENTS?

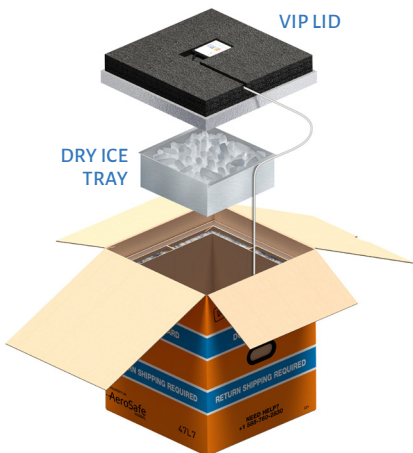

Vaccination is the most critical tool in the fight against COVID-19 and equitable access has to be ensured. Transporting COVID-19 vaccines from the manufacturer to supplier hubs to the POU requires a cold chain solution that maintains the recommended storage temperature requirements at all times to ensure efficacy, reliability, and overall safety.

AeroSafe Global has the answer. For more than 15 years, we have been providing zero-excursion distribution of temperature-sensitive medicines to the biopharmaceutical industry, healthcare providers, and even NASA (see Figure 1). That coupled with our ongoing commitment to adhering to rigorous standards means that we can enable you to meet critical last-mile distribution needs across any temperature range.

To support your readiness for vaccination of frontline workers, populations at risk and mass vaccination campaigns, we are supplying cold chain solutions that will deliver the COVID-19 vaccines safely and reliably, when and where they are needed, **starting now**. Whether requiring large-scale quantities or smaller volumes, we are working closely with critical stakeholders to facilitate distributions for the last mile access for all COVID-19 vaccines.

MODULAR, TURNKEY COLD-CHAIN SOLUTIONS

COLD-CHAIN SOLUTION FOR PRIMARY DISTRIBUTION

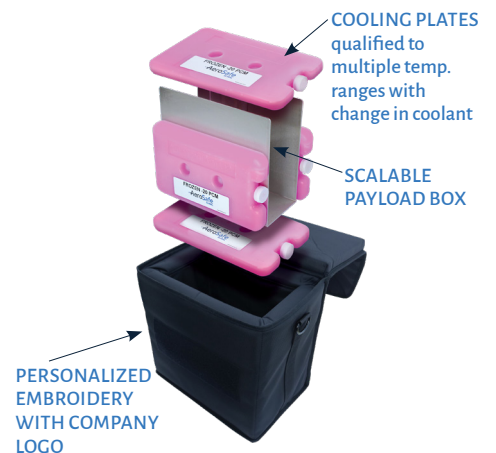

Scalable payload box, holding up to 5,000 doses

COLD-CHAIN SOLUTIONS FOR SECONDARY DISTRIBUTION

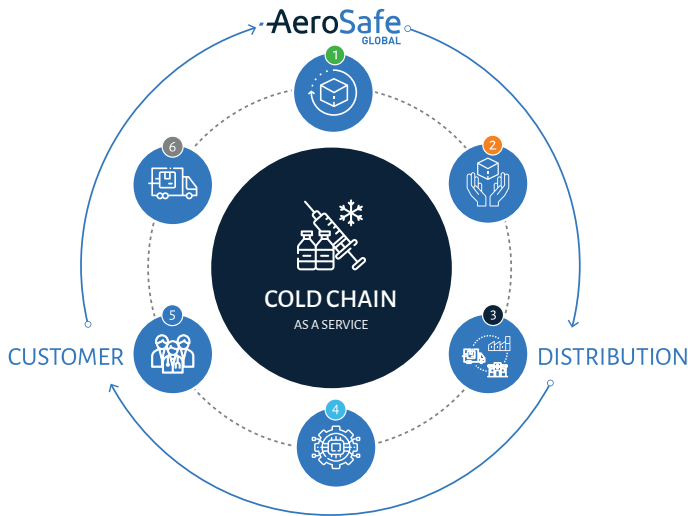

Scalable payload box, holding up to 1,000 doses

AEROCASE | COLD-CHAIN SOLUTION FOR LAST-MILE DISTRIBUTION

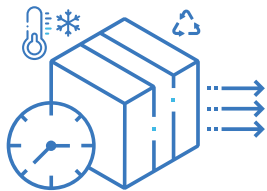

Scalable payload box, holding up to 300 doses

FIGURE 1. AeroSafe Global Cold Chain as-a-Service: We provide a total, turnkey solution—from design and testing to training and day-to-day management. This holistic approach ensures a seamless and timely delivery of COVID-19 vaccine with the needed packaging, essential data, management and logistics services.

TOP REASONS TO CHOOSE AEROSAFE GLOBAL FOR COVID-19 VACCINE COLD CHAIN SUPPLY:

- **SIMPLE AND EFFICIENT:** AeroSafe caters to your needs with flexible and customizable solutions for different distribution sizes and different temperature ranges from ultra-frozen to refrigerated.
- **RELIABLE:** Our zero excursions distribution along with the option of automated temperature monitoring and QR codes for provider engagement for safe, reliable delivery of COVID-19 vaccine.
- **SUSTAINABLE:** Our AeroLoop program supports sustainability and lowers carbon footprint.

AEROLOOP PROGRAM PROVIDES SAFE AND SIMPLE RETURN PROCESS

When you're ready to return the solution, our **AeroLoop Reuse program** is completely managed by us, removing the burden of return logistics while significantly reducing carbon footprint, energy usage, and waste (see Figure 2).

MOVE FORWARD WITH A TRUSTED PARTNER

AeroSafe Global is ready with the right solutions to ensure successful COVID-19 vaccine cold chain distribution. We are committed to helping our customers minimize the burden of distribution and logistics in order to advance care during the vaccination phase of the pandemic. Our cold-chain solution portfolio and decades of expertise in cold-chain supply help reduce the risk, cost, and complexity of distributing the COVID-19 vaccine, especially for last-mile POU locations.
