

Introduction

The purpose of the AIM Annual Survey is to assess and characterize immunization program (IP) policy, infrastructure, program activities, priorities, and the impact of funding changes (both federal and state) on immunization programs. AIM administers the survey annually to document changes over time within immunization programs (IP).

Information gathered from the survey is used to generate reports and presentations on the status of immunization programs and to respond to inquiries from Congressional staff, partners, the media, and others. Survey results will be reported anonymously and in aggregate form. Should a situation arise where it would be beneficial for identifiable data to be shared, AIM will seek and confirm approval with the respective jurisdiction(s) before sharing any such information. By continuing with this survey, you acknowledge the above conditions and give your consent for AIM to utilize your survey responses under these circumstances.

The survey has 33 questions and is estimated to take 45-75 minutes. Prior to completing the online version, it may be beneficial to review the PDF version of the survey (sent via email and included in the weekly update) and share it with other relevant staff to gather pertinent information.

Please Note: You can re-enter the online survey at any time to modify your responses before submitting it. To re-enter/open to edit, you must continue using the same computer and browser, and you must complete the page by finishing all the questions on the current page and then clicking "next." If you exit the survey before clicking "next" to complete the page, your responses on that page will not be saved. Once you complete the entire survey and click "submit", you cannot return to edit your responses.
