

Did U hear? Josè's mom had covid!

She's already getting better.
She's vaxxed. Did U get your shot yet?

That stinks. I hope she's OK.

Noooo. They rolled it out too fast.

They've been researching this kind of shot for years.

Yeah but how can u be sure it works... look at Josè's mom! Also I heard there r side effects. 🙄

the shot DID work... it kept her from dying. my side effects weren't that bad. My arm was sore and got a headache... that's better than being on a ventilator 🤒

haha but now you've got that chip tracker in u and your dna 🧬 is all messed up

LOL there's no electronics in the shot. LOL there's no tracker in the shot and your DNA is perfectly safe.

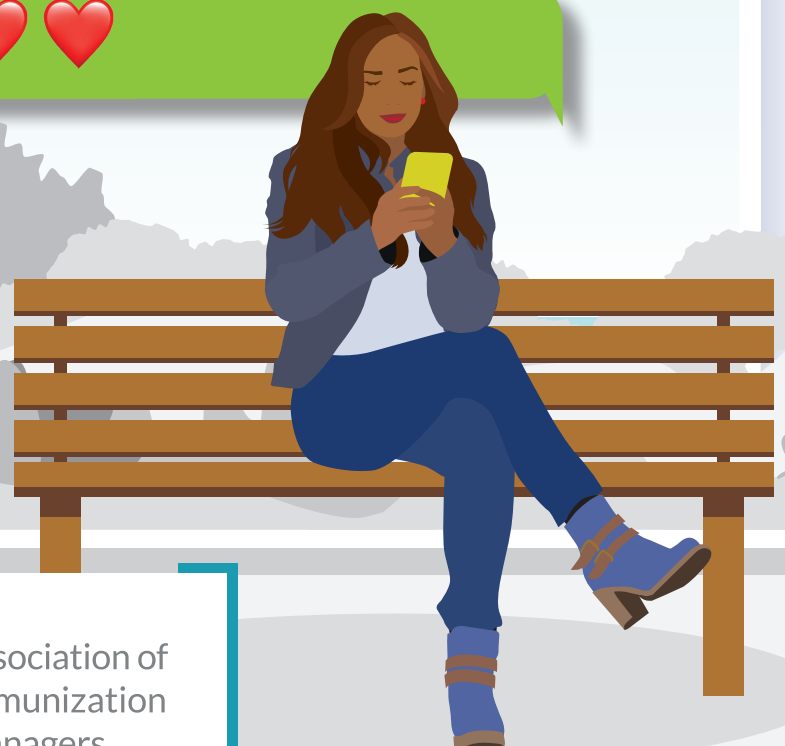

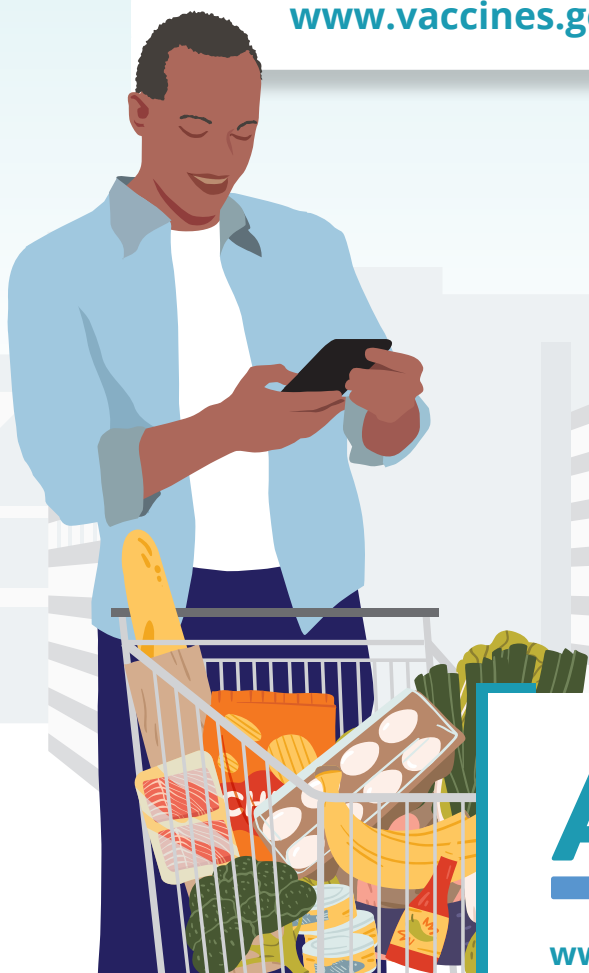

but what about if I want to have another baby?

Studies show the vax will protect you AND your baby... it's safe. Anyway, at least think about it. I don't want you ending up sick.

ok. send me the link so i can find an appointment.
