### AIM Legislative Round-up: January 16, 2026

With 34 state legislative sessions underway as of January 16, AIM is relaunching our biweekly Legislative Round-ups. These high-level overviews of vaccine-related legislation across the country are designed to provide a snapshot of AIM's state level bill tracking, with more frequent or specific bill analysis always available upon request.

AIM is currently monitoring 201 bills that were prefilled, introduced, or advanced in the legislative process since August 1, 2025. AIM continues to monitor more than 300 vaccine-related bills introduced last year in the 26 states that carry bills over into a second year of legislative session. An overview of the **140** bills with legislative movement over the last two weeks is provided below.
